

I am a Grower/Farmer of citrus that is processed by Porterville Citrus Inc., and my job activities fall within Federal and State guidance:

FOOD SUPPLY

The food supply makes up critical infrastructure from farm to table and includes assets, systems, networks, and functions that provide vital services to the nation. It is essential that critical infrastructure and supply chains are protected, and that all elements pertaining to the food supply remain operational, including a workforce that is vital to production of the food supply.

More information is provided in the National Infrastructure Protection Plan to help further clarify these critical infrastructure systems.

Porterville Citrus Inc. processes and ships fresh citrus domestically and internationally from these 8 facilities:
