AUDIT SCOPE:

To conduct a Primus GFS v2.1-2 GMP audit on the packing house that serves citrus: oranges. The packinghouse had approximately 120 employees that worked the packing facility. The commodities come in large plastic bins, then are ran down the orange packing line. The lines have 3 recirculated wash tanks (using LA ChemChlor for an antimicrobial). The commodities are treated with a fungicide, and are waxed. Next the commodities are placed into food grade boxes or bags. Then, the commodity is placed in cooler storage before shipment to the buyer. No organic oranges are handled at this facility, and no allergens were present at the facility. The facility is in operation from Oct. to June, or as needed as market permits.

PRODUCTS:

PRODUCT(S) OBSERVED DURING AUDIT

Oranges
