AUDIT EXECUTIVE SUMMARY:

PCI Porterville is a citrus packing house that is approx. 91,000 square feet. Oranges were observed at the time of the inspection. Product is brought to the facility in bins and placed in the degreening rooms (seasonally ethylene gassed), bins are dumped onto the wash line where there is an optional single pass spray bar treated with chlorine, they then run-through the dark room on rollers, and are passed through the high pressure washer recycled water treated with chlorine, optional single pass potable water rinse, water elimination over rollers and under fans, pregrading, waxing, heated dryer, hand grading, sizing, packing hand or mechanical into cases, palletized and stored in the cold storage until needed for shipments. There is an optional fungicide flooder with recirculating water that is used when needed. This is only used by the operation occasionally and was not observed at the time of the inspection. Recirculated water for the flooder is treated with PAA. There are no allergens handled by the operation and no CCPs have been identified.
